Tax Amounts by Decile for Calendar Years 2002 and 2007

Introduction

Some readers of the tax incidence study have expressed interest in knowing more detail about the distribution of the various taxes by decile than is given in the text of the report. For their benefit, the following tables contain the complete distribution of every tax analyzed in the incidence study.

The table for each tax shows the amount imposed directly on Minnesota households and the amount of business tax shifted to Minnesota households. The amounts are allocated by both population deciles and income deciles. Also shown are the tax amounts for the top 5% and top 1% of households for each type of decile. Tables are given for 2002 historical data and projected 2007 data.

The 2007 projections are based on the forecast published in February 2005 by the Minnesota Department of Finance.

Income Ranges 2002			
Population Decile	Income Range	Income Decile	Income Range
1	\$8,354 & under	1	\$26,678 & under
2	8,355 - \$14,065	2	26,679 - 40,235
