EXPLANATION OF THE BILL

Current Law: Income tax withholding revenue is deposited in the General Fund.

Proposed Law: The bill would dedicate a portion of the growth in income tax withholding remitted by businesses in selected industries to the Minnesota Science and Technology Fund. The bill creates the Minnesota Science and Technology Fund in the State Treasury. The dedicated amount equals 85% of any increase in aggregate withholding from the designated industries above calendar year 2010 levels, after adjusting for inflation. The consumer price index for the Minneapolis-St. Paul metropolitan area is used to adjust the base-year 2010 withholding annually for inflation. The dedicated amount cannot exceed \$25 million per year.

The bill specifies the purposes for which amounts in the new fund may be used.

REVENUE ANALYSIS DETAIL

- Withholding tax remitted by businesses in the designated industries totaled \$436 million in calendar year 2009 (down from \$486 million in 2008). Totals include tax remitted by businesses of all types. Nonprofit organizations and government entities are excluded.
- Total wages in the designated sectors are assumed to grow at the rate forecast for all Minnesota manufacturing, based on the February 2011 forecast. Because the average manufacturing wage is forecast to grow at roughly the same rate as inflation, withholding tax amounts are assumed to increase at the same rate as wages.
- Inflation assumptions are based on the February 2011 forecast for increases in the U.S. consumer price index (CPI-U).
- Based on these assumptions, the \$25 million cap would apply starting in fiscal year 2014 (calendar year 2013 withholding).
- The proposal allows estimated payments to be made to the new fund prior to annual certification by the Commissioner of Revenue. Certification is required within 120 days of the end of the calendar year. The estimates assume transfers occur in the same fiscal year as certification. Earlier payments would increase fiscal impact in fiscal years 2012 and 2013.
