		(000's)		
General Fund	\$0	\$0	(\$50,000)	(\$50,000)

Effective for aids payable in 2005 and thereafter.

EXPLANATION OF THE BILL

Current Law: For determining the amount of local government aid, the city formula aid is equal to the need increase percentage multiplied by the difference between 1) the city's revenue need multiplied by its population, and 2) the sum of the city's net tax capacity multiplied by the tax effort rate, and taconite aids multiplied by the following percentages:

- 0% for aids payable in 2004;
- 25% for aids payable in 2005;
- 50% for aids payable in 2006;
- 75% for aids payable in 2007; and
- 100% for aids payable in 2008 and thereafter.

The need increase percentage must be the same for all cities, and no city may have a formula aid amount less than zero.

The total appropriation for local government aid to cities is limited to \$429,000,000 in 2004 and \$437,052,000 in 2005 and thereafter.

Proposed Law: The proposal eliminates taconite aids from the calculation of the city formula aid. The amount appropriated for local government aid is increased to \$487,052,000 for aids payable in 2005 and thereafter.

REVENUE ANALYSIS DETAIL

- The proposal would increase the local government aid appropriation by \$50 million in FY 2006 and thereafter.
- The elimination of taconite aids from the measure of revenue-raising ability would shift aid to certain cities receiving taconite aid and away from other cities. Increasing the city formula appropriation level would offset the aid reduction to non-taconite cities.

Number of Taxpayers: 853 cities eligible to receive local government aid.
