EXPLANATION OF THE BILL

Current Law: The angel investment tax credit is the commonly-used name for a provision identified in statute as the small business investment tax credit. The refundable individual income tax credit is equal to 25% of the investment made in a qualified small business. The maximum credit for a tax year is \$250,000 for a married couple filing a joint return and \$125,000 for other filers. The investment can be made directly by a qualified taxpayer or through a qualified angel investment network fund that invests in a qualified small business. The law specifies the requirements for the investor, the investment fund, the investment, and the small business. For tax years 2011 through 2014, current law limits the amount of tax credits that can be allocated to \$12 million per tax year. There is no allocation after tax year 2014.

Proposed Law: The bill would provide an allocation of tax credits for tax year 2015 and 2016. The allocation would be \$15 million per tax year. The bill requires \$7.5 million of the annual credit allocation to be used for investments in greater Minnesota and minority-owned and women-owned businesses.

REVENUE ANALYSIS DETAIL

- It is assumed that the maximum \$15 million in credits would be approved for each tax year.
- Tax year impact is allocated to the following fiscal year.
