Margaret Reisdorf welcomed the committee and reviewed the agenda. Ms. Reisdorf reviewed the meeting agenda and shared the goals she had set for today's meeting.

The committee began to review a draft of proposed language for Subpart 3 of the rule. This subpart addressed Non-Taxable sales.

As part of the discussion of Subpart 3, members of the committee emphasized the importance of having such a distinction between software as a service and data processing in the rule. Members also discussed ways to refine and improve examples provided in the subpart, and discussed opportunities to use less technical and industry-specific jargon so that the rule would be more approachable for the general tax payer.

At the end of the meeting, Ms. Reisdorf reviewed the outcomes of the meeting and gave a preview of what she hoped the committee would discuss at the next meeting.

The next meeting is October 17, 2018 at 3:30 PM at Stassen Building, Department of Revenue.
