Soft drinks are nonalcoholic beverages that contain natural or artificial sweeteners.

“Natural and artificial sweeteners” means an ingredient of a food product that adds a sugary sweetness to the taste of the food product.

For sales tax purposes, beverage powders and concentrates are not considered soft drinks.

Bottled Water

If no sweeteners are added, carbonated, non-carbonated, or flavored bottled water are generally not taxable (regardless of size).

Delivery charges for nontaxable water are also exempt.

However, bottled water is taxable when the seller provides straws or other eating utensils. For more information, see Prepared Food Fact Sheet.

Alcoholic Beverages

Alcoholic beverages are taxable. Alcoholic beverages contain 0.5% or more alcohol by volume.

Beer, wine, and liquor sold by a business with an intoxicating liquor license are subject to the general sales tax rate, liquor gross receipts tax, and any local taxes that apply. For more information, see the Eating Establishments Guide.

Nonalcoholic Beer

Nonalcoholic beer is a taxable soft drink because it contains sweeteners. These beverages are subject to the general sales tax rate and any applicable local taxes.

Additional Information

Any beverage listed as exempt in this fact sheet becomes taxable when it is served in a glass, cup, or pitcher. For more information, see the Eating Establishments Guide.
