# MINNESOTA•REVENUE 

## Tax Year 2008 Overview

The data in the following tables are from the Minnesota individual income tax sample for tax year 2008. This is a stratified, random sample, produced annually, of Minnesota tax returns supplemented with federal return data. This allows the capture of data from the Federal form 1040 and supporting schedules regarding sources of income and details of itemized deductions as well as items from the Minnesota return not obtained during regular processing. The 2008 sample contains 35,278 records from a total of 2,607,271 in the tax filing population that year.

The tables show data distributed by federal adjusted gross income (FAGI) for Minnesota residents with an additional line for the total of nonresident filers. Table A contains federal data for all filers, Table B shows details of itemized deductions, and Table C has data from the Minnesota form M-1.

Total incomes and deductions shown for nonresidents are the totals claimed on their federal tax returns. Much of that income is not allocated to Minnesota. As a result, nonresidents account for only 4.2 percent of Minnesota tax liability (before credits) even though they reported 21 percent of the all-filer total for federal adjusted gross income (FAGI), 23 percent of the all-filer total for itemized deductions, and 24 percent of the all-filer total for federal taxable income.
